## How to Use Spray ON/OFF Control Adaptors

### ■SNB adaptor (CSN, SN adaptors)

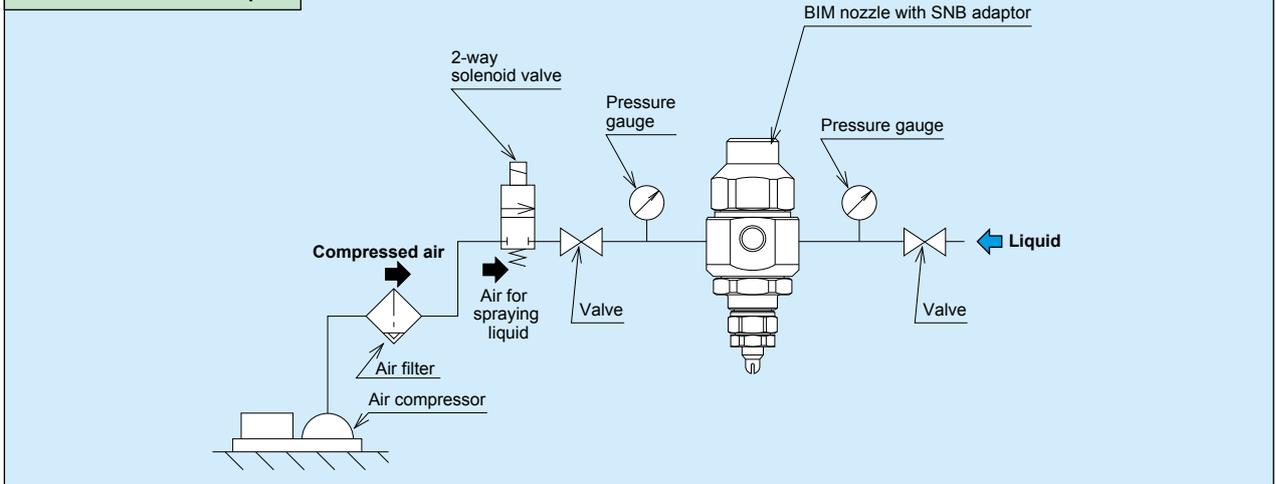

Spray ON/OFF can be regulated by turning compressed air ON/OFF.

Compressed air pressure must be 0.2 MPa or higher in order to start the spray.

Adaptor types **CSN** (see page 30) and **SN** (page 35) are used in the same way.

Function chart	
Compressed air	OFF   ON   OFF   ON   OFF
Liquid	Stop   Spray   Stop   Spray   Stop

#### Connection example

### ■SPB adaptor (CSP, SP adaptors)

Spray ON/OFF can be regulated by switching the pilot air ON/OFF.

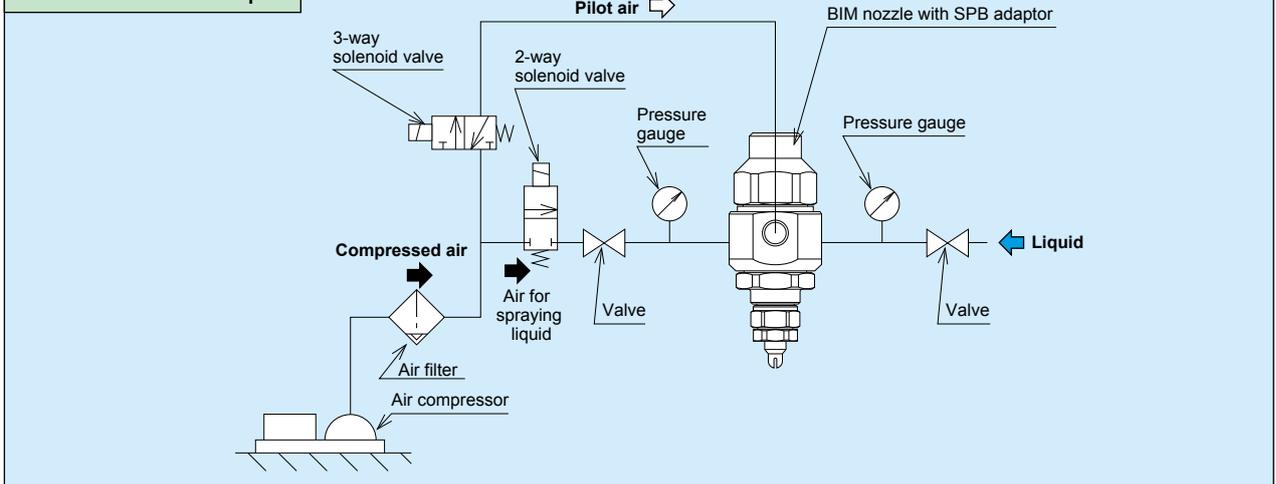

The pilot air actuates an internal piston to regulate the spray. (Pilot air pressure must be 0.2 MPa or higher.)

As even low pressure atomizing air can be used, production of a range of fine to coarse fog is possible. Best-suited for when there is concern about scattering droplets.

Adaptor types **CSP** (see page 30) and **SP** (page 35) are used in the same way.
